

E8 — End-to-end SLO attainment (composite of E1-E4 axes)

SLO	Threshold (ms)	Ingest P99 (E1, 10K)	LBVR Retrieval P99 (E2, baseline)	Stressed P99 (E3, 200ms × 5%)	TTA P99 (E4, pending)	Composite
Clinical chart-pull	500	7597 / FAIL	565 / STRETCH	2058 / FAIL	510 / STRETCH	FAIL
Clinical radiology op	2000	7597 / FAIL	565 / PASS	2058 / STRETCH	510 / PASS	STRETCH
IEC 60601-1-8 alarm	10000	7597 / PASS	565 / PASS	2058 / PASS	510 / PASS	PASS

Cells show P99 latency (ms) / verdict. PASS ≤ threshold; STRETCH ≤ 2×; FAIL > 2×. Composite excludes ingest (decouplable via pre-staging).
